The offline file write mode

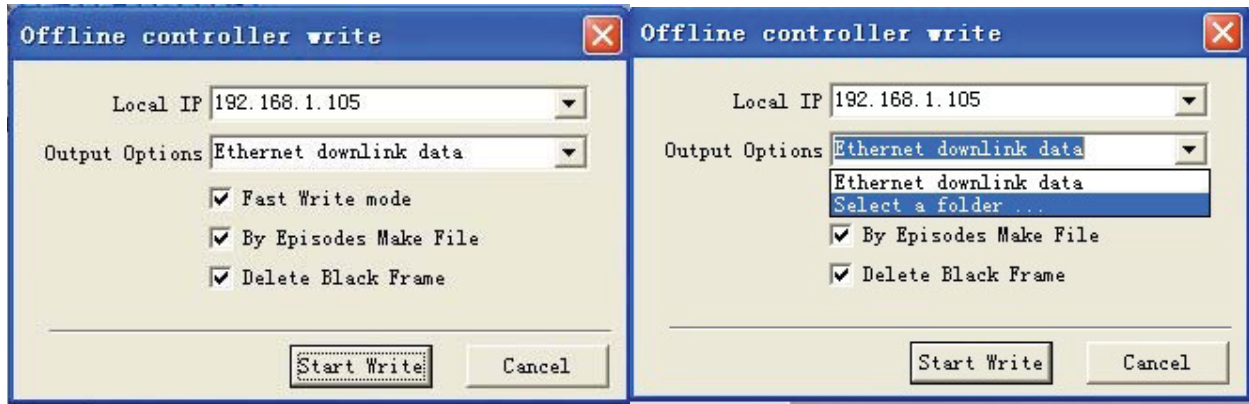

Offline file two kinds of ways to write

- 1, Choose a folder: the file to a location on your computer hard drive, SD card reader and then use test equipment to the card file;
- 2, Removable disk: If the SD card and card reader connected to your computer, there will be this option, select this option file will be prepared to directly test card.

Note: This SD card must be formatted as FAT32, suggested ways to write 1. After the offline file is written to the normal broadcast device will work to put strobe lights (if not the documentation of this phenomenon is written in error, please re-format the SD card, and then write).

As shown below:

The hardware connection
